

Malaria-LAMP

Spotting Malaria Reliably

- Sensitive even in low-prevalent settings
- Robust and easy to perform
- Detection of asymptomatic, sub-microscopic infections

Malaria-LAMP

Spotting Malaria Reliably

High sensitive and fast method for Malaria testing

- › Listed in the WHO Policy brief on malaria diagnostic in low-transmission settings¹
- › Differentiation between *Plasmodium pan spec.*, *P. falciparum* and *P. vivax*
- › Clear and fast result interpretation
- › Flexible solution for low to high throughput
- › Dried reagents for a high robustness
- › Applicable in remote areas
- › Results in 1...2 hours
