

HumaLoop T/M

Molecular Screening of Pathogens in Peripheral Laboratories

- All-in-one instrument for LAMP technology
- Ideal solution for remote settings
- Robust and easy-to-use

HumaLoop T/M

Incubator for Sample Processing, Amplification & Result Reading

Features and technical specifications

- › HumaLoop T – Molecular detection of *MTBC*
- › HumaLoop M – Molecular detection of *Plasmodium spec./P. falciparum/P. vivax*
- › Preinstalled incubation times and temperatures for a failsafe operation
- › Solution for up to 16 tests/run and 70 samples/day
- › Integrated fluorescence module for visual result reading
- › Mobile solar panel and portable battery system for operation without power supply
